DECISIONS

MICROPROCESSOR CONTROLLED EXTINGUISHING SYSTEMS
FIRE TRACE EXTINGUISHING SYSTEMS · EDP EXTINGUISHING
SYSTEMS · SYSTEM GUARANTEE · GENERAL FIRE PROTECTION

Fire fighting is an art, but its prevention in the first place is our passion. Fractions of a second can be the difference between loss and preservation of valuable equipment and data. This period of time is an active challenge for us. Once personally engaged, we successfully set the highest possible standards in object-related fire protection and take responsibility for staff, machines and, ultimately, the future of businesses. For this purpose we offer qualified advisory services, provide effective technology and meet most individual customer demands by a comprehensive system guarantee – that ensures that safety is not just a vision for you, but becomes a daily routine!

LEADING TECHNOLOGY.

PERSONAL ENGAGEMENT.

OUR PHILOSOPHY.

PERSONAL ENGAGEMENT · COMPREHENSIVE SYSTEM GUARANTEE

With its product and service investments designed for growth and system partnerships, KRAFT & BAUER holds a top position in the supply of extinguishing systems for a range of protection objectives. Decades of experience in the development and

production of fire protection systems has enabled us to become an international system supplier. Both leading mechanical engineers and worldwide industrial enterprises rely on our high technological standards.

Both national and international businesses gain from our unique fire protection systems. KRAFT & BAUER products are found wherever safety is demanded in production environments.

TECHNOLOGICAL SUPERIORITY.
CERTIFIED QUALITY.
CUSTOMER-ORIENTED MOTIVATION.

TECHNOLOGICAL SUPERIORITY · CERTIFIED QUALITY · CUSTOMER-ORIENTED MOTIVATION

Pioneering technology, highest quality demands and well-founded confidence – KRAFT & BAUER is renowned for complete fire protection that ensures optimum functionality, effectiveness and reliability.

Our complete range of products offers you a comprehensive service and direct support, starting at the consultation stage, then through development and assembly, right up to the scheduled installation, initial operation, training and maintenance.

The first consultation on-site, at which we analyse the locality and product situation as a competent and neutral observer, is the first step for your optimum solution. The fire protection is designed exactly in accordance with customer demands, thereby ensuring smooth assembly under the watchful guidance of our specialist teams and skilled partners.

TECHNOLOGICAL SUPERIORITY · CERTIFIED QUALITY · CUSTOMER-ORIENTED MOTIVATION

Custom-oriented liaison and procedure is a matter of course to our highly qualified and motivated employees. The decisive factors in our long-term partnerships with our customers are knowledge, experi-

ence and reliability. In order to provide you with the utmost possible safety, each of our products and services are governed by tight quality management pursuant to ISO 9001:2000.

Discover the important world of fire avoidance and fire fighting for the safety of your business and production areas. The rapid development of production engineering and the increasing sensibility of centralised data processing calls for solutions that may be exactly adapted to each situation. With our modular structured extinguishing systems for property fire protection and pressure release damper for machine tools with individual or central exhaustion, as well as extinguishing systems for data processing systems and explosion protected areas, we ensure system guarantee and already fulfil tomorrow's demands today!

3

- 1 Microprocessor controlled CO₂ extinguishing systems FB 703/704 for machine tools.
- 2 Fire Trace Extinguishing system with detection hose for fire capturing.
- 3 Machine tools with centralised exhaustion – including fire protection damper, and pressure release damper with system guarantee.
- 4 Fire protection for system and data cabinets.

PRODUCTION KRAFT & BAUER automatic CO₂ extinguishing systems are manufactured using the most modern machine tool technology and correspond to the highest standards and provisions. They may be integrated into most types of machine without difficulty. As a system partner we offer solutions for open and closed machines, as well as for spark extinguishing systems to protect centralised exhausts. Depending on each requirement we also provide alternative extinguishing agents for extinguishing systems in production environments, and in server cabinets and data processing rooms.

EDP (Electronic Data Processing) Microprocessor controlled Air extinguishing systems ensure safety and fulfil individual customer requirements in control and server cabinets or telephone installations. Additionally, we also provide complete systems for EDP rooms.

GENERAL FIRE PROTECTION. KRAFT & BAUER has been offering fire protection appliances for more than 40 years, and the complete range currently includes manual fire extinguishers, mobile extinguishing devices, smoke and heat exhaust systems, hydrants and hoses.
